Professional Summary

Computer Science undergraduate targeting roles as **Software Developer / SDE**, **Machine Learning Engineer**, and **AI Engineer**. Strong foundation in **Object-Oriented Programming (OOP)**, **Data Structures**, and **Algorithms**, with experience in backend development using **Python** (automation scripts, **REST APIs**, **Flask**) and **JavaScript**. Hands-on work with **regression** and **classification** models, **ML training pipelines**, and **data processing** using TensorFlow and PyTorch. Skilled in **prompt engineering** and **AI model integration** for LLM-based applications, focused on writing **clean, scalable, efficient code** and solving impactful real-world problems.

Skills

Programming:	Python, C, C++, Java, JavaScript
Core CS:	Object-Oriented Programming, Data Structures, Algorithms.
Machine Learning:	Regression, Classification, ML Models, Training Pipelines, Data Processing
AI / LLMs:	Prompt Engineering, Model Integration, Generative AI Applications
Backend:	Flask, REST APIs, Automation Scripts, API Integration
Web:	HTML, CSS, Bootstrap, Tailwind, Responsive Design
Tools / Platforms:	Git, GitHub, Streamlit, Vercel, TensorFlow, PyTorch
Soft Skills:	Teamwork, Adaptability, Critical Thinking, Communication, Fast Learning

Projects

Handwritten Assignment Grader Python, Streamlit, OCR, Gemini API

- Built an end-to-end web application that evaluates handwritten student answers using **OCR** and **Gemini AI**.
- Added **grammar correction**, **content classification**, and structured scoring to reduce manual review and improve consistency.

Home Loan Advisor Python, Streamlit, Gemini API

- Developed a FinTech tool to calculate **EMIs**, check loan eligibility, and simulate financial scenarios via interactive inputs.
- Integrated **AI-driven recommendations** using Gemini for personalized explanations and user guidance.

Your Buddy Speaker Python, Tkinter, TTS APIs

- Created a multilingual desktop application that performs text translation and text-to-speech conversion.
- Implemented voice selection, translation pipeline, and real-time speech output using **Python automation** and TTS APIs.

Pathfinding Visualizer JavaScript, HTML, Tailwind CSS

- Built an interactive visualizer for **A***, **Dijkstra's**, **BFS**, and **DFS** algorithms with animations and maze generation.
- Enabled side-by-side comparison of algorithms to strengthen understanding of **data structures and algorithms**.

Certifications / Certificates

Introduction to Hardware and Operating Systems	IBM
Full Stack Development: Frontend to Backend	Udemy
Generative AI Apps with No-Code Tools	Infosys SpringBoard
ChatGPT-4 Prompt Engineering & LLMs	Infosys SpringBoard

Achievements

- Led a team as **Team Leader** during an IoT hackathon to build **AUTONO**, a web tool that identifies and supports slow learners using interactive assessments.
- Appreciated by organizers for strong **leadership**, clear communication, and delivering a functional MVP within tight deadlines.

Education

Lovely Professional University	Aug 2023 – Present
Bachelor of Technology in Computer Science Engineering (Machine Learning)	CGPA: 8.04
Himgiri Public School	Apr 2020 – Jun 2022
Intermediate (Class XII)	Percentage: 74.83
Himgiri Public School	Apr 2019 – Mar 2020
Matriculation (Class X)	Percentage: 78
